Library is oligo-dT primed and directionally cloned (EcoRV site is destroyed upon cloning). Average insert size 1.8 kb, insert size range 1.3 kb. Library is normalized and enriched for full-length clones and was constructed by C.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gruber (Invitrogen). Products from the present invention can be used to treat Wilsy-related
C disorders such as breast, ovarian, and colon cancer or melanoma. The
C products can be used to treat arteriosclerosis. The products can also be
C used to treat other diseases e.g. benign and malignant tumours,
CC leukaemia and lymphoid malignancies, neuronal, glial, astrocytal,
CC hypothalamic and other glandular, macrophagal, epithelial, stromal, and
CD blastocoelic disorders, haematopoiesis-related disorders, kidney
CC disorders, skin disorders, desmoplasia, fibrotic lesions, kidney
CC disorders, bone-related disorders such as osteoporosis, trauma such as
CC burns, incisions, and other wounds, connective tissue disorders,
CC catabolic states, testicular-related disorders, and inflammatory,
CC angiogenic and immunologic disorders including arteriosclerosis. The
CC products can also be used for detection and diagnosis especially of
CC individuals with neoplastic cell growth or proliferation. The products
CC can be used in the production of transgenic or knock-out animals.

Antibodies can be used to induce death in WISP-1, 2 or 3 overexpressing
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    14-APR-1998;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present invention describes Wnt-1 induced secreted polypeptides. WISP-1, 2 and 3. The novel WISP polypeptides, designated WISP-1, Wish and WISP-3 have homology to connective tissue growth factor (CTGF)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Disclosure; Page 246; 284pp; English.

                                                                                                                                                 The present invention describes Wnt-1 induced secreted polypeptides, WISP-1, 2 and 3. The novel WISP polypeptides, designated WISP-1, WISP-2 and WISP-3 have homology to connective tissue growth factor (CTGF). Products from the present invention can be used to treat WISP-related disorders such as breast, ovarian, and colon cancer or melanoma. The products can be used to treat arteriosclerosis. The products can also be used to treat other diseases e.g. benign and malignant tumours, leukaemia and lymphoid malignancies, neuronal, glial, astrocytal, hypothalamic and other glandular, macrophagal, epithelial, stromal, and blastocoelic disorders, haematopolesis-related disorders, kidney disorders, skin disorders, desmoplasia, fibrotic lesions, kidney disorders, bone-related disorders such as osteoporosis, trauma such as burns, incisions, and other wounds, connective tissue disorders, testicular-related disorders, and inflammatory, catabolic states, testicular-related disorders, and inflammatory.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                14-APR-1998;
29-OCT-1997;
03-FEB-1998;
                              products can also be used for detection and diagnosis especially of individuals with neoplastic cell growth or proliferation. The production be used in the production of transgenic or knock-out animals.

Antibodies can be used to induce death in WISP-1, 2 or 3 overexpres
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               connective tissue growth factor; cancer; melanoma; arteriosclerosis; leukaemia; lymphoid malignancy; haematopolesis-related disorder; tissue-growth disorder; skin disorder; desmoplasia; fibrotic lesion;

The products can be used to treat arteriosclerosis. The products can also be used to treat other diseases e.g. benign and malignant tumours, leukaemia and lymphoid malignancies, neuronal, glial, astrocytal, hypothalamic and other glandular, macrophagal, epithelial, stromal, and blastocoelic disorders, haematopolesis related disorders, kidney c disorders, skin disorders such as osteoporosis, trauma such as c disorders, bone-related disorders such as osteoporosis, trauma such as c disorders, bone-related disorders, connective tissue disorders, catabolic states, testicular-related disorders, and inflammatory, c angiogenic and immunologic disorders including arteriosclerosis. The c products can also be used for detection and diagnosis especially of c individuals with neeplastic cell growth or proliferation. The products can be used in the production of transgenic or knock-out animals.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Query Match

                                                                                                                                                                                                                                                                                                                                                                                                cc products can be used to treat arteriosclerosis. The products can also be used to treat other diseases e.g. benign and malignant tumours, compared to treat other diseases, neuronal, glial, astrocytal, cleukaemia and lymphoid malignancies, neuronal, glial, astrocytal, cleukaemia and other glandular, macrophagal, epithelial, stromal, and blastocoelic disorders, haematopolesis-related disorders, kidney clistorders, skin disorders, haematopolesis-related disorders, kidney clistorders, skin disorders such as osteoporosis, trauma such as burns, incisions, and other wounds, connective tissue disorders, catabolic states, testicular-related disorders, and inflammatory, capitagenic and immunologic disorders including arteriosclerosis. The products can also be used for detection and diagnosis especially of individuals with neoplastic cell growth or proliferation. The products can be used in the production of transgenic or knock-out animals.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The present invention describes Wnt-1 induced secreted polypeptides, WISP-1, 2 and 3. The novel WISP polypeptides, designated WISP-1, WISP-2 and WISP-3 have homology to connective tissue growth factor (CTGF). Products from the present invention can be used to treat WISP-related disorders such as breast, ovarian, and colon cancer or melanoma. The

Agents that stimulate or inhibit HICP protein activity or expression, antisense HICP nucleic acid molecules and HICP antibodies, can be used to modulate cell-associated activity. HICP modulators can be used to treat disorders characterized by aberrant HICP protein activity or expression. Probes capable of hybridizing to HICP mRNA or antibodies specific for HICP can be used to detect HICP activity in a biological sample. HICP can be used to treat disorders, such as a cardiovascular or fibrotic disorder.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The invention provides a rat heparin-induced CCN-like protein (HICP) protein. Agents that stimulate or inhibit HICP protein activity or expression, antisense HICP nucleic acid molecules and HICP antibodies, can be used to modulate cell-associated activity. HICP modulators can be used to treat disorders characterized by aberrant HICP protein activity or expression. Probes capable of hybridizing to HICP mRNA or antibodies specific for HICP can be used to treat disorders, such as a cardiovascular or fibrotic disorder, characterized by aberrant cell proliferation. The present sequence represents the rat HICP mature polypeptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Disclosure;
